

**Section
AOT****Temporary cancellation of LTH 54 concerning formal
recognition of Part 66 personnel and
ARC recommendation for ELA 1 aircraft**

As the legal basis for the regulations of LTH 54 (M.A.901 (g)) has ceased to exist due to the amendment of Regulation (EU) No 1321/2014 with the implementing Regulation (EU) 2019/1383, which has been in force since 24 March 2020, the Airworthiness Notice LTH 54 dated 27 March 2009 including all appendices is declared invalid until the corresponding adaptation to the new regulations.

It is therefore no longer possible to issue a licence under the current LTH 54, but it is possible to issue an examiner's licence according to Part-ML (ML.A.901 (b)(4)) under the amended conditions. The revision of the LTH 54 for the implementation of the regulations of the new Part-ML is already in progress.

If you are interested in an examiner licence and your maintenance licence is the responsibility of Austro Control GmbH, please contact airworthiness@austrocontrol.at
