

Request for General ATFMX Approval

This form is intended for companies and operators regularly conducting flights requiring exemption from flow measures (e.g. transports of radioactive isotopes or organs for transplantations). Please note the use of the STS/ATFMX indicator can be approved for flights departing from Austria only. For flights departing from other countries, the relevant regulations must be applied.

The general ATFMX approval will be granted for a year; thereafter, a new approval request shall be made.

Companies and operators granted a general ATFMX approval are required to:

- comply with the relevant prescriptions for the use of STS/ATFMX indicator as laid down in the IFPS Users Manual and the Aeronautical Information Publication Austria, ENR 1.9;
- in particular, to use the granted exemption from flow measures only for those flights where a delay caused by flow measures would endanger human life or the physical integrity of a person or the flight mission as stated in the original request;
- keep all documentation supporting the need for flow exemptions for each flight where the STS/ATFMX indicator has been used for at least 3 months after the flight and produce them on request.

The signing companies and operators shall be particularly made aware, that the STS/ATFMX indicator shall not be used for pre-positioning flights, except in singular cases, where delayed pre-positioning would endanger human life(s) or the flight mission as stated in the general approval request.

Transmit the completed and signed form to AIS/ARO Wien:
Fax: +43 (0) 5 1703 3256 E-Mail: ais.loww@austrocontrol.at
