

## Acknowledgment of the safety regulations for external companies

The supervisor of the contractor confirms, on behalf of the company management, the acknowledgment of the 'Safety Regulations for External Companies'. Furthermore, it is confirmed that the deployed personnel have been informed about the 'Safety Regulations for External Companies'.

If the contract includes construction, assembly, or service activities (maintenance, cleaning, security, etc.) then the "Safety Regulations for External Companies" must be brought demonstrably to the attention of all contractor employees (see appendix 1).

This acknowledgement must be signed and handed over to the ACG employee responsible for the contract or the ACG on-site contact person prior the works begin. In case of non-compliance with the "Safety Regulations for External Companies" and after a single warning, individuals may be expelled from the ACG premises, and legal consequences may follow.
